

The disruption caused by the COVID pandemic and geopolitical issues have exposed the weaknesses of the supply chain in the global pharma industry. TCG Lifesciences has emerged from this challenge largely unscathed due to the commitment of our talented team and prompt management actions. We have also experienced significant growth and managed to refresh our talent pool both in India and the US, despite shortages in the labor market, and have proved to be a reliable partner. I take this opportunity to thank all our stakeholders -- customers, employees, shareholders and suppliers for your continued support and contributions to making 2022 the most successful year to date.

***Wishing you all a very merry Christmas
and a terrific 2023!***

Swapan Bhattacharya
Managing Director
